The application has been amended as follows:

In claim 1, lines 9-12, "wherein an auxiliary electrode is provided behind the opening of one of the main electrodes; and means for increasing conversion efficiency" has been replaced by --and a means for increasing conversion efficiency including an auxiliary electrode provided behind the opening of one of the main electrodes. --

In claim 7, lines 10-12, "wherein said means for increasing conversion energy includes an auxiliary electrode, which exhibits an opening on the axis of symmetry, provided between the main electrodes" has been replaced by -- and a means for increasing conversion energy including an auxiliary electrode, which exhibits an opening on the axis of symmetry, provided between the main electrodes. --

Allowable Subject Matter

3. Claims 1-4 and 7-30 are allowed.

4. The following is an examiner's statement of reasons for allowance:

6. **As per claim 7 and dependent claims 15-17 and 21-25**, the examiner found no reference in the prior art that disclosed or made obvious a device for generating extreme ultraviolet and soft X-rays from a gas discharge, operated on the left hand branch of the Paschen curve comprising a means for increasing conversion energy including an auxiliary electrode which exhibits an opening on the axis of symmetry, provided between the main electrodes as recited in independent claim 7.

7. **As per claim 8 and dependent claims 9, 18-20 and 26-30**, the examiner found no reference in the prior art that disclosed or made obvious a device for generating extreme ultraviolet and soft X-rays from a gas discharge, operated on the left hand branch of the Paschen curve wherein each of the main electrodes has a plurality of openings as recited in independent claim 8.
